part 2

1 Post accepts a body.

2. Post accepts an application JSON

3. https://practiceapi.devmountain.com/api/posts?id=555

4.200 all good, 409 missing content

5 url : https://practiceapi.devmountain.com/api/posts

body: {

  "text": "Jon Nielsen"

}

6. https://practiceapi.devmountain.com/api/posts?id=1322

{

"text": "Yay blue, everyone likes blue"

}

7. https://practiceapi.devmountain.com/api/posts/filter?text=blue

8 application/json; charset=utf-8

9. 409 would

Request was missing req.query.id or req.body.text

10. The query response looks like a normal get, I think it discards irrelevant arguments, and just does a normal get.
